# Document Specifications

This document contains information regarding Johnson  
Tiles Australia and our Environmental Policy.

# Your Vision Your Design

---

Johnson Tiles is a leading tile manufacturer and supplier of ceramic and porcelain tiles, with a long proud history grounded in manufacturing, product development and customer service. With over 100 years of experience in tiles and operating in Australia for more than 55 years, servicing both domestic and commercial markets; you can trust our experience.

Johnson Tiles believes in sustainable manufacturing practices that protect and conserve our environment for future generations.

As a responsible ceramic tile manufacturer, we are very aware of the environmental impacts that our operations have on the environment and we are committed to minimising our negative impacts and improve environmental performances.

# Environmental Policy

---

## Energy and Water Conservation

Where possible, Johnson Tiles are committed to minimising use of energy, water and other natural resources in our manufacturing process.

## 100% Recyclable Materials

Johnson Tiles pride ourselves on being 100% recyclable in its products. Given that our tiles are made from natural products, they are in turn 100% recyclable. Our factories practice a 'reduce, reuse and recycle' approach throughout our operation products.

## Waste Management

Johnson Tiles are continuously reviewing and optimising our use of raw materials, and are continuously reducing waste through better waste management.

## Environmental Awareness Training

Johnson Tiles provide our staff with environmental awareness training to assist in effectively reducing our environmental impact.

## Improving Environmental Performance continually

Johnson Tiles are always looking for new innovations and methods to improve environmental performance.

## Greenguard Gold Certified

Our factories are Greenguard Gold certified; ensuring that our products are environmentally friendly and free of Volatile Organic Compounds (VOCs), they are certified for low chemical emissions for indoor air quality.

# Why is recycling tiles important?

---

Recycling or re-using tiles is an important practice as, by recycling, ceramic waste doesn't contribute to increasing landfill. This can also help by reducing the demand for the natural resource.

Re-used tiles can be used in mosaic projects, in art pieces or around the home. Pinterest has many creative ideas for recycling tiles. In some cases, tiles in good condition, free of grout and adhesive, may even be used again in another project.

Recycled ceramics can be used in drainage materials, as bases for paths or driveways, in composite material for aggregates and in road bases under bitumen.

For more information on Tile recycling facilities, please see below:

## **Concrush Recycling Facility**

21 Racecourse Rd  
Teralba NSW 2284  
(02) 4958 3777  
[www.concrush.com.au](http://www.concrush.com.au)

## **Adelaide Waste and Recycling Centre**

181 Morphett Road  
North Plympton SA 5037  
(08) 8295 5077  
[www.adelaidewasteandrecyclingcentre.com.au](http://www.adelaidewasteandrecyclingcentre.com.au)

## **Capital Recycling**

Welshpool Yard  
39 Briggs Street  
Welshpool WA 6106  
(08) 9355 2511

## **Suez Australia**

Hampton Park and Resource Recovery Park  
274 Hallam Road  
Hampton Park VIC 3976  
(03) 9799 6277  
<https://www.suez.com.au/en-au>

## **Postans (Henderson) Yard**

119 McLaughlan Road  
Postans WA 6167  
0408 946 350  
[www.capitalrecycling.com.au](http://www.capitalrecycling.com.au)

Some councils also accept ceramic and porcelain tiles for recycling.

Your **Vision.** Your **Design.** Our **Innovation.**
